

SMARTSCULPTPro

THE WORLDS No1 FAT REDUCTION & BODY CONTOURING TECHNOLOGY

Reduce fat, tighten skin and improve cellulite. 2000 installations delivering to over 100,000 clients world wide.

Intelligent Body Shaping with a proven track record.

The SMART Sculpt Pro combines leading and proven technologies to deliver comfortable and non-invasive treatments for circumference and fat reduction, skin tightening, total body contouring and the successful treatment of cellulite.

Combination of 4 proven Technologies:

Simultaneously working together to provide significant effective energy promoting cell destruction, metabolism, promotes collagen regeneration, stimulate fibre reconstruction and increases skin structure and texture.

FEATURES & BENEFITS

Infrared Heating Technology

Fast heating of superficial skin for tightening and increased metabolic activity.

- ✓ Enhances results and tightens skin.

Adaptive Roller Massage

Increases blood and lymph circulation, accelerates the metabolism of unwanted fat cells.

- ✓ Improved results, smoother and healthier skin.

Intelligent and powerful Bi-Polar RF

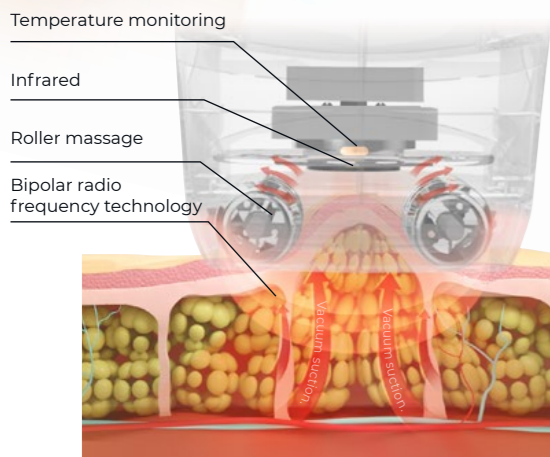

Gold standard 150w Bi-Polar 40.68 MHZ RF achieves optimum temperature within seconds with deep penetration of 15mm into subcutaneous fatty tissue maximising apoptosis and the stimulation of deep collagen fibres.

- ✓ Faster treatment times, efficient end point realisation & increased clinical results.

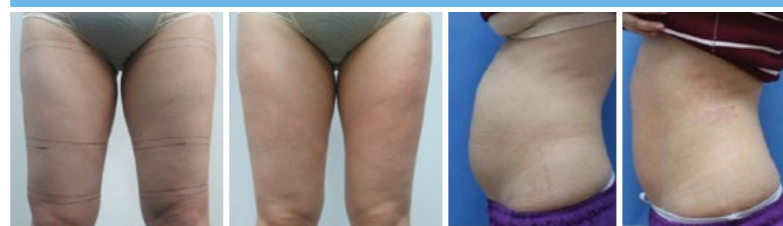

Vacuum Suction Technology

Adjustable negative pressure for all skin tones allows for skin to be targeted precisely.

- ✓ Increased and better results.

BEFORE & AFTER TREATMENTS

SMART FIT - Why should you offer SMART SculptPro?

Dynamic Temperature Monitoring.

In-treatment control of optimum temperature points, ensuring precise thermal dosage for high clinical efficiency, increased client safety and comfort

Intelligent Software & Touch Screen.

Fully adjustable parameters

POWER and Speed.

150w Bi-Polar RF reduces treatment times by up to 75%

Quiet and Comfortable.

Under 60db

Adjustable Applicators.

Tailored parameters for bespoke client comfort and better results

Sculpt.

Sculpt is used for larger sized body parts such as buttocks, abdomen and thighs
